I understand that Naturopathy is a safe, non-invasive method of analyzing the body's physical and nutritional needs, and that deficiencies or imbalances in these areas could cause or contribute to various health problems.

I understand that Naturopathy is not a method for "diagnosing" or "treating" of any disease including the conditions of cancer, AIDS, or other medical conditions, and that these are not being tested or treated.

No promise or guarantee has been made regarding the results of any natural health, nutritional or dietary programs recommended, but rather I understand that Naturopathy is a way to help the body's natural healing abilities to overcome possible nutritional imbalances, so that safe natural programs can be developed for the purpose of bringing about a more optimum state of health.
